

Karim is a first year student, studying CSE. He is tensed with his Electrical circuit lab. He decided to talk about the subject with his friend Rahim.

Hi Rahim! What a bad day it was in the electronics circuit lab! I just passed the lab standing, couldn't understand the experiment. What about you?

I also faced the same problem. No guidelines to follow! let's ask Meena.. I think she better knows what to do in this case.

Then they went to meet Meena. Maybe Meena knows something. Let's see what she says!!

They told the problem to meena. Meena heard everything. She smiled. Rahim and karim became confused.

Heheh! I have recently met a senior who made a website about electronic circuit lab. The site has information about experiments, videos, lectures, animation etc. I understood the last lab topic from here. You could get help from this site.

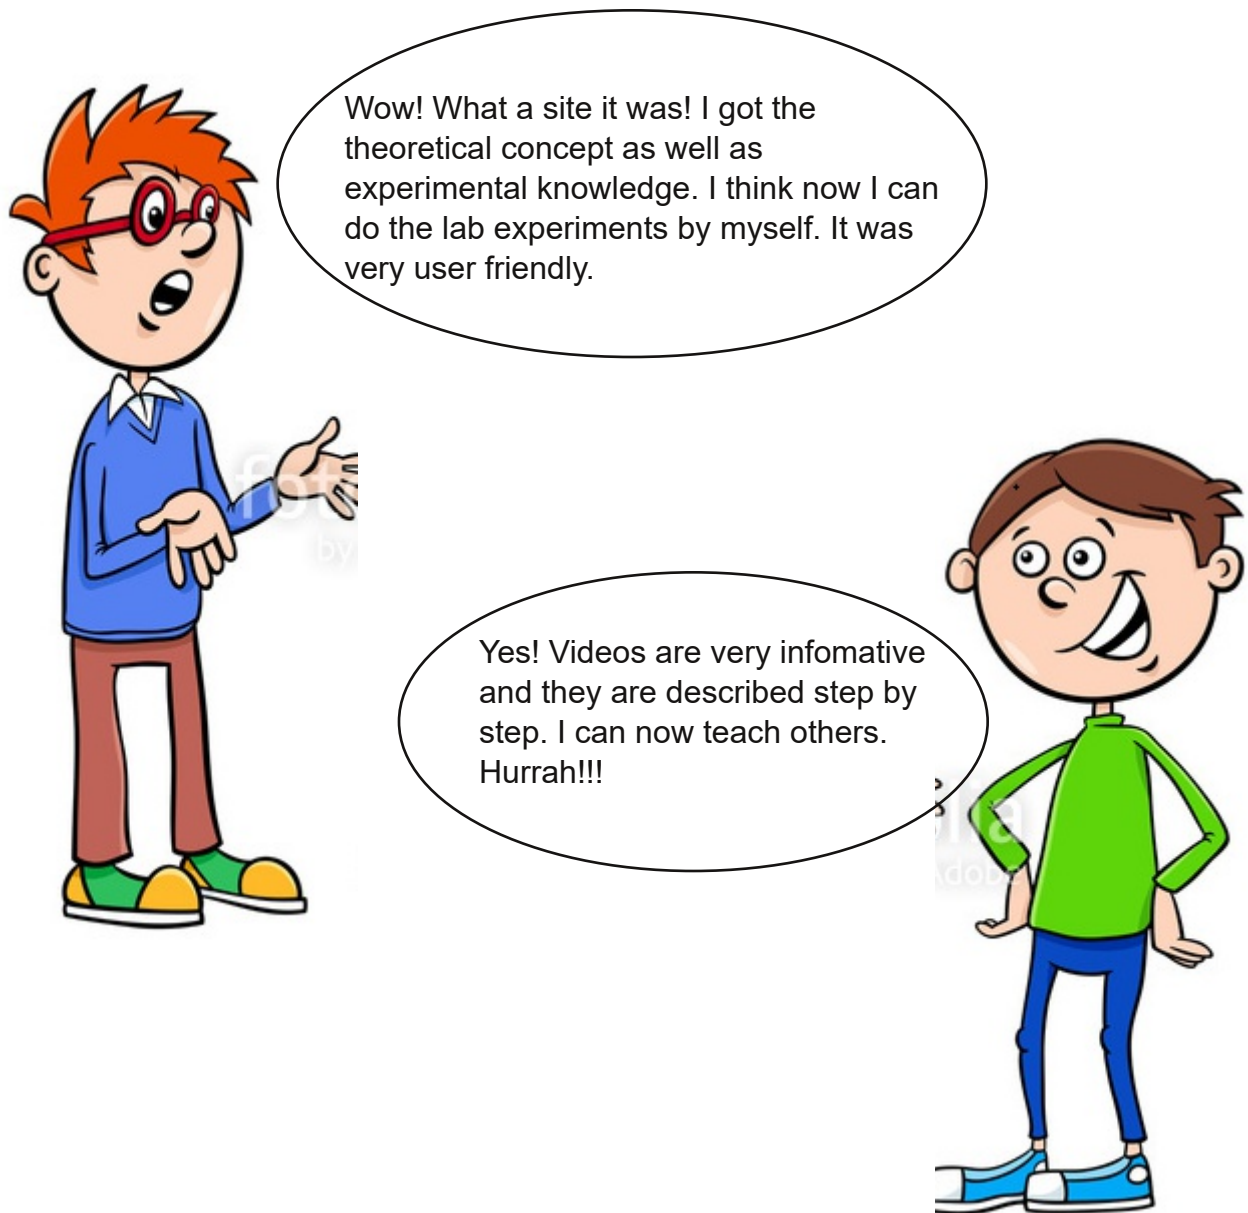

Oh really!

Let's visit the site.
Thank you
Meena!!

Yes! You helped a lot.

After visiting the website, they exchanged their experiences.

In this way, the first year students solved their problems through this website. The multimedia project benefitted all the students in the long run. The project prototype will be updated and improved further on students reviews.
